

GALVANISED COMPRESSION COUPLINGS

Precision cast in malleable cast iron to BS6681 B32-10 enabling easy fitting. The prominent “centre-hex” affords a secure grip of the fitting to be made, allowing the end caps to be tightened with ease. The couplings are galvanised to provide protection against corrosion. NBR rubber to ISO 4658-1990, BS2751-1990.

INCHES	mm	Product description
1/2"	15mm	Galvanised Compression Coupling 1/2"
3/4"	20mm	Galvanised Compression Coupling 3/4"
1"	25mm	Galvanised Compression Coupling 1"
1 1/4"	32mm	Galvanised Compression Coupling 1 1/4"
1 1/2"	40mm	Galvanised Compression Coupling 1 1/2"
2"	50mm	Galvanised Compression Coupling 2"

Hydroformed steel body, rubber compression gasket, and metal friction ring. Sizes are made for repairs on galvanized pipe Size: 1/2' -2" compression Pipe repair coupling. Extra heavy duty long pattern steel body, with malleable iron nuts and rubber gaskets. Sized to fit outer diameter for steel and PVC pipe. Double tapered design of rubber gasket provides two seals at each end.
